## **BOARD MEETING PROCESS**

**(See also April 2008 Minutes)**

Conduct of FASAB meetings is expected to follow the general guidelines below. However, the chairman will apply judgment as needed in light of differences between research stage projects and projects nearing completion. The Chairman will weigh the appropriate stage of the project to initiate the more formal process envisioned below. Staff also will consider this factor in preparing the agenda and identifying issues in staff papers.

1. The staff paper identifies key issues to be discussed and resolved. Staff will place emphasis on the most important issues and present issues in a logical order.
2. Members inform staff in advance of the meeting if they wish to make an alternative proposal or have concerns with an issue (ideally this notice will be in writing).
3. Staff can then inform the chairman in advance of the meeting regarding member feedback. This will help to identify non-controversial issues where members might be asked to approve the staff recommendation on a no objection basis and allow more time for discussion of areas of controversy.
4. Recognizing the role of the staff as the expert on the project, staff identified issues will be addressed first. New issues from members would be deferred until after resolution of staff identified issues. There will be a brief overview from staff regarding the issue and then member discussion. This will ensure members have a chance to ask staff questions and understand issues.
5. Then the chairman will go around the table and ask each member to share their position on the specific issue. This will be done without interruption/no reaction to member positions will occur until each member has identified his or her position. Then there will be a period of time for members to ask questions of each other. Then members will vote on the issue. This allows members to coalesce around positions.
