## NEWS RELEASE

### **FASAB Issues its Annual Report and Three-Year Plan**

The Federal Accounting Standards Advisory Board (FASAB or “the Board”) published its *Annual Report for Fiscal Year 2018 and Three-Year Plan* today. The combined report allows stakeholders to consider FASAB’s progress and invites them to advise the Board about its plans.

The report reviews the Board’s efforts and accomplishments during fiscal year 2018 and provides information about current projects, as well as potential projects the Board will consider in 2019 agenda-setting discussions. FASAB requests your written comments regarding the content of the annual report and the Board’s project priorities for the next three years. In addition, the Board is considering educational efforts. Input regarding educational needs will help frame those efforts.

Written comments are most helpful if they provide the reasoning for your views. Please provide your comments by **January 23, 2019**.

The Board also plans to conduct an online survey to help in assessing the most important priorities for the future. The survey will open in late November. More details will be available then on the FASAB homepage at [www.fasab.gov](http://www.fasab.gov).

The report is available at <http://www.fasab.gov/our-annual-reports/>.

## **ABOUT FASAB**

FASAB serves the public interest by improving federal financial reporting through issuing federal financial accounting standards and providing guidance after considering the needs of external and internal users of federal financial information.

Financial reports, which include financial statements prepared in conformity with generally accepted accounting principles, are essential for public accountability and for an efficient and effective functioning of our democratic system of government. Thus, the Board plays a major role in fulfilling the government's responsibility to be publicly accountable. Federal financial reports should be useful in assessing (1) the government’s accountability and its efficiency and effectiveness and (2) the economic,

political, and social consequences, whether positive or negative, of the allocation and various uses of federal resources.

FASAB issues federal accounting standards after following a due process consistent with the Memorandum of Understanding under which it operates. Due process includes consideration of the financial and budgetary information needs of citizens, congressional oversight groups, executive agencies, and the needs of other users of federal financial information.
