

Reporting Entity

Please submit to fasab@fasab.gov

Name of Respondent: John Lynskey, Division of Financial Management Deputy Director

Organization: National Science Foundation

All responses are requested by July 3, 2013.

Q1. The Board is proposing three inclusion principles for an organization to be included in the government-wide GPFFR:

- An organization with an account or accounts listed in the *Budget of the United States Government: Analytical Perspectives—Supplemental Materials* schedule entitled “Federal Programs by Agency and Account” unless the organization is a non-federal organization receiving federal financial assistance
- An organization in which the federal government holds a majority ownership interest
- An organization that is controlled by the federal government with risk of loss or expectation of benefit

In addition, the Board is proposing that an organization be included in the government-wide GPFFR if it would be misleading to exclude it even though it does not meet one of the three inclusion principles.

Refer to paragraphs 20-36 of the proposed standards and paragraphs A12- A29 in Appendix A - Basis for Conclusions for a discussion and related explanation.

a. Do you agree or disagree with each of the inclusion principles? Please provide the rationale for your answer.

NO NSF COMMENT

b. Do you believe the inclusion principles, and the related definitions and indicators, are helpful and clear? Please provide the rationale for your answer.

NO NSF COMMENT

c. Do you agree or disagree that an organization should be included in the GPFFR if it would be misleading to exclude it even though it does not meet one of the three inclusion principles? Please provide the rationale for your answer.

NO NSF COMMENT

d. Do you agree the inclusion principles can be applied to all organizations, such as the Federal Reserve System, Federally Funded Research and Development Centers, Government Sponsored Enterprises, museums, and others, to determine whether such organizations should be included in the government-wide GPFFR? Please provide the rationale for your answer.

NSF requests that FASAB further clarify the inclusion of Federally Funded Research and Development Centers (FFRDCs). In the case of the National Science Foundation, pursuant to the NSF Act (Public Law 81-507, amended by 42 USC (1861 – 1887)), provision 42 USC 1873, “The Foundation shall not, itself, operate any laboratories or pilot plants.” Although NSF legally considers and is noted as the sponsoring agency for four FFRDCs, as it relates to the intent of this ED, the Foundation’s inability to manage or operate the facilities makes

them more equitable to contract or grant organizations. NSF requests that FASAB add language to this point in paragraphs 32 – 34.

Q2. The Board proposes distinguishing between two types of organizations in GPFFRs and this distinction will ultimately determine how they are reported: consolidation entities and disclosure organizations. Consolidation entities generally are (1) financed by taxes or other non-exchange revenue as evidenced by their inclusion in the budget, (2) governed by the Congress and/or the President, (3) imposing or may impose risks and rewards on the federal government, and/or (4) providing goods and services on a non-market basis. In contrast, disclosure organizations are those that (1) receive limited or no funding from general tax revenues, (2) have less direct involvement, and influence, by the Congress and/or the President, (3) impose limited risks and rewards on the federal government, and/or (4) are more likely to provide goods and services on a market basis.

The Board proposes consolidation entities be consolidated in the government-wide financial statements and the information about disclosure organizations be disclosed in notes. The Board also proposes that certain factors and objectives be considered in determining the information about disclosure organizations to be disclosed in notes. The Statement allows flexibility in the information presented as long as the disclosure objectives are met. The Statement also provides examples of information that may meet objectives.

Refer to paragraphs 37- 53 and 64-77 of the proposed standards and paragraphs A30-A54, A62-A63 and A71-A81 in Appendix A - Basis for Conclusions for a discussion and related explanation.

1. **Do you agree or disagree with the concept of distinguishing between consolidation entities and disclosure organizations? Please provide the rationale for your answer.**

NO NSF COMMENT

2. **Do you agree or disagree with the attributes used to make the distinction between consolidation entities and disclosure organizations? Please provide the rationale for your answer and identify additional attributes, if any, that you believe should be considered.**

NO NSF COMMENT

1. c. **Do you agree or disagree that, assuming the organizations are determined to be organizations included in the GPFFRs, the attributes are adequate to make a determination of whether organizations such as the Federal Reserve System, Federally Funded Research and Development Centers, museums, and others are consolidation entities or disclosure organizations? Please provide the rationale for your answer and identify any organizations you believe the attributes could not be adequately applied to, and additional attributes, if any, you believe are needed to address these organizations.**

The definition of consolidation entities to include “financed through taxes, and other non-exchange revenues”, and the requirement that disclosure organizations “receive limited or no funding from general tax revenues” should be reconsidered. In several illustrative scenarios, and in practice, the fact that federal funds may be the primary source of funding for an organization does not determine whether it is part of the GPFFR or its status as a disclosure entity or consolidation entities. Furthermore, paragraphs 32 – 34 of the ED indicate that economic dependency does not equate to control. Since economic dependency can be a characteristic of entities that are excluded from the GPFFR, and both consolidation entities and disclosure organizations, removing it from the definition of both should be considered.

- d. **Do you agree or disagree with:**

- i. **the factors to be considered in making judgments about the extent of appropriate disclosures (see par. 69),**
- ii. **the objectives for disclosures (see par. 72), and**
- iii. **the examples provided (see par. 73)?**

NO NSF COMMENT

Please provide the rationale for your answers.

Q3. The Board proposes each component reporting entity report in its GPFFR organizations for which it is accountable; that includes consolidation entities and disclosure organizations administratively assigned to it. Administrative assignments can be identified by evaluating:

- the scope of the budget process,
- whether accountability is established within a component reporting entity, or
- rare instances of other significant relationships such that it may be misleading to exclude an organization not administratively assigned based on the previous two principles.

The Board recognizes that in rare instances it also may be misleading to include an organization that is administratively assigned to a reporting entity based on the above principles. In such cases, the organization may be excluded.

Refer to paragraphs 54-63 of the proposed standards and paragraphs A55-A61 in Appendix A - Basis for Conclusions for a discussion and related explanation.

- a. **Do you agree or disagree that each component reporting entity should report in its GPFFR organizations for which it is accountable, which includes consolidation entities and disclosure organizations administratively assigned to it? Please provide the rationale for your answers.**

NO NSF COMMENT

- b. **Do you agree or disagree that administrative assignments can be identified as provided in paragraphs 54-63? Please provide the rationale for your answers.**

In the case of FFRDC's, FASAB should consider adding reference to the "Master Government List of Federally Funded Research and Development Centers (FFRDCs)", published annually by NSF. This list could aid in determining FFRDC administrative assignment. The 2013 list can be found at <http://www.nsf.gov/statistics/ffrdclist/>.

Q4. The Statement provides for each reporting entity (the government-wide and component reporting entities) to consolidate financial information for all consolidation entities for which it is accountable without regard to funding source (for example, appropriations or donations). For certain organizations, such as museums and performing arts organizations, this may lead to consolidating funds from sources such as donations that are presently not consolidated in the government-wide GPFFR.

Refer to paragraphs 54-. of the proposed standards and paragraph A19 in Appendix A - Basis for Conclusions for a discussion and related explanation.

Do you agree or disagree that each component reporting entity (for example, museums) and the government-wide reporting entity should consolidate in their entirety organizations for which it is accountable without regard to funding source, including

those receiving appropriations and donations? Please provide the rationale for your answers.

NO NSF COMMENT

Q5. For consolidation entities, the Statement proposes that FASAB and Financial Accounting Standards Board (FASB) based information should be consolidated without conversion of FASB-based information to a FASAB basis.

Refer to paragraphs 65- 66 of the proposed standards and paragraphs A66-A70 in Appendix A - Basis for Conclusions for a discussion and related explanation.

Do you agree or disagree that consolidation of FASAB and FASB based information without conversion for consolidation entities is appropriate? Please provide the rationale for your answers.

NO NSF COMMENT

Q6. Central banking (through the Federal Reserve System) is a unique federal responsibility with distinctive characteristics. The proposed standards do not specify that the central banking system be included in GPFFRs or whether, if included, it would be classified as a consolidation entity or a disclosure organization. Because of the unique nature and magnitude of central banking transactions, and the fact there is only one organization of this type, the Board proposes certain minimum disclosures regarding the central banking system. These disclosures would be required in addition to any other reporting requirements regarding the central banking system. The information should be disclosed in the government-wide GPFFR and the GPFFR of any reporting entity to which it may be primarily associated with or administratively assigned. Depending on the circumstances, some of the minimum disclosures may have been addressed in other requirements. The resultant disclosures should be integrated so that concise, meaningful, and transparent information is provided and information is not repetitive.

Refer to paragraph 77 of the proposed standards and paragraphs A30-A37 in Appendix A - Basis for Conclusions for a discussion and related explanation.

- a. **Do you agree or disagree with the minimum disclosures for the central banking system or believe there are additional disclosures that should be considered? Please provide the rationale for your answer.**

NO NSF COMMENT

- b. **Do you believe there are other significant organizations for which minimum disclosures should be made? Please specify which entities, if any, and the nature of disclosures and provide the rationale for your answer.**

NO NSF COMMENT

Q7. The Board proposes a definition of related parties and disclosures for related parties where the relationship is of such significance that it would be misleading to exclude disclosures about the relationship. The proposal also provides a list of the types of organizations that generally would or would not be considered related parties.

Refer to paragraphs 78 -87 of the proposed standards and paragraphs A82-A84 in Appendix A – Basis for Conclusions for a discussion and related explanation.

- a. **Do you agree or disagree with the related parties definition and requirements? Please provide the rationale for your answer.**

In paragraph 80, FASAB indicates that significant influence may be exercised by representation on the board of directors or equivalent governing body. The National Science Foundation, by law, must consist of a Director and National Science Board (NSB). The persons nominated for appointment as members of the board are eminent in the fields of the basic sciences, medical science, engineering, agriculture, education, or public affairs and are appointed by the US President. The NSB establishes the policies of NSF within the framework of applicable national policies set forth by the President and Congress. In this capacity, the Board identifies issues that are critical to NSF's future, approves NSF's strategic budget, and approves new major programs and awards. The Board also serves as an independent body of advisors to both the President and the Congress on policy matters and education related to science and engineering.

Several NSB members may be affiliated with entities to which NSF issues grants or contracts. Most often these board members are professors or hold honorary positions at the awardee institution. NSF is concerned that the related party definition as currently written will be applied to organizations with which NSB members are affiliated. NSF does not support this view and does not see any indication in the related party illustration in Appendix C, page 74, Andromeda Prime Power Systems (related Part- GSE), this is FASAB's intent. Indicating a related party relationship between the federal government and organizations that receive grants such as not-for-profit entities and collegial institutions would grossly mislead the public.

In order to clearly denote that NSB members as individuals, or the entities they are affiliated with, are not in related party relationships with NSF; NSF requests that FASAB add additional clarifying language. Suggestions for this clarification are indicated below:

Paragraph 80 – The current reference to policy decisions should be narrowed to distinguish between “operational” (day-to-day, transactional level) and “strategic” (high level strategy and direction) policy decisions. Strategic policy decisions do not have a direct influence on financial transactions and operating decisions and should not be determinative of the existence of related party relationships. In the case of the NSB, the Board's strategic decisions do not directly influence the day to day operational and financial transactions of the Foundation (individual awards to grantees, etc.). NSF suggests adding the language from paragraph 79 to the first sentence of paragraph 80 to clarify the intent: ***“Significant influence (for the purpose of this Statement) is the power to participate in the financial and operating policy decisions of an entity, but not control those policies.”***

Paragraph 84 – Although Paragraph 84 c) indicates that “key executives of the federal government and organizations owned or managed by key executives, other employees of the federal government, or members of their families” should be excluded from the related party definition; NSF suggests that FASAB explicitly add ***“Including Presidentially appointed agency board members”*** to the list of exclusions. Alternatively, paragraph 84 b) could be expanded to state ***“This exclusion also applies to management and board members of institutions that jointly serve on the board of a federal agency. This occurrence does not automatically result in a related party relationship between the federal government and the individual or the federal government and the affiliated institution.”***

Furthermore, NSF requests that FASAB add the term “that may or may not” to paragraph 84 b) as indicated below:

“Organizations with which the federal government transacts a significant volume of business that **may or may not** result in economic dependence such as....”

- b. Do you agree or disagree with the list of the types of organizations that generally would be considered related parties? Please provide the rationale for your answer.**

NO NSF COMMENT

- c. **Are there additional organizations that generally should be considered related parties? Please provide the rationale for your answer.**

NO NSF COMMENT

- d. **Do you agree or disagree with the list of exclusions? Please provide the rationale for your answer.**

As noted in response Q7 a above, NSF suggests that FASAB explicitly add in 84c "**Presidentially appointed agency board members**" to the list of exclusions. Alternatively, paragraph 84 b) could be expanded to state "**This exclusion also applies to management and board members of institutions that jointly serve on the board of a federal agency. This occurrence does not result in a related party relationship between the federal government and the individual or the federal government and the affiliated institution.**"

Furthermore, NSF requests that FASAB add the term "that may or may not" to paragraph 84 b) as indicated below:

"Organizations with which the federal government transacts a significant volume of business that **may or may not** result in economic dependence such as...."

- e. **Are there additional exclusions that should be considered? Please provide the rationale for your answer.**

As noted in response Q7 d above, NSF suggests that FASAB explicitly add "**presidentially appointed agency board members**" to the list of exclusions.

Q8. The Board proposes conforming changes to Statement of Federal Financial Accounting Concepts (SFFAC) 2, *Entity and Display*, to rescind or amend language to remove criteria for determining what organizations are required to be included in a federal reporting entity's GPFRR from the concepts statement because criteria will be in a statement of federal financial accounting standards. Refer to paragraphs 88-101 of the proposed standards and paragraphs A85-A88 in Appendix A - Basis for Conclusions for a discussion and related explanation.

Do you agree or disagree with the conforming changes to SFFAC 2? Please provide the rationale for your answer.

NO NSF COMMENT

Q9. The Board proposes the Statement and Amendments to SFFAC 2, *Entity and Display*, be effective for periods beginning after September 30, 2016. Refer to paragraph 102 of the proposed standards.

Do you agree or disagree with this effective date? Please provide the rationale for your answer.

NO NSF COMMENT

Q10. The Statement provides two non-authoritative appendices to assist users in the application of the proposed standards. The Flowchart at Appendix B is a tool that can be used in applying the principles established. The Illustrations at Appendix C offer hypothetical examples that may be useful in understanding the application of the standards.

Refer to Appendix B-Flowchart and Appendix C-Illustration.

- a. Do you agree the appendices are helpful in the application of the proposed standards?

NO NSF COMMENT

- b. Do you believe the appendices should remain after the Statement is issued?

Yes – the illustrative scenarios in particular help the reader to understand FASAB's intended application of each definition.

- c. Do you believe there should be any changes or additional examples regarding the illustrations that would be useful in understanding the application of the standards? Please provide rationale to support your answer.

NSF, and presumably other agencies with Boards such as the Nuclear Regulatory Commission and Federal Communications Commission, would benefit from a related party scenario involving agency Board members. The scenario should involve a federal agency with a board of directors that approves strategic and high level budget decisions. A board member with an administrative or professor role at a collegial institution, or that serves in a management capacity at a not-for-profit organization should be included. The illustration should indicate that the agency does **not** have a related party relationship with the board member or the institution/organization with which the board member is affiliated. NSF is open to providing the board with scenario details if desired.

Q11. Are there other unique situations that should be addressed within this Statement? Please explain fully and also how the situation is not addressed by this Statement when considered in its entirety.

Q12. One member has an alternative view regarding receiverships, conservatorships, and interventions. The Board member does not believe receiverships, conservatorships, and intervention organizations should be equated with other disclosure organizations. He believes guidance in the proposed standards gives the impression that these organizations are part of the federal government. Further, he believes all types of interventions should be addressed in the Board's project on risk assumed.

The other members believe the proposed standards appropriately distinguish between consolidation entities and disclosure organizations including receiverships, conservatorships, and interventions resulting in ownership or control. The Board deliberated alternatives regarding such organizations, including creating an "exception" similar to the approach taken in SFFAC 2, but determined an exception would be rules-based rather than principles-based. Such an exception would require more detailed guidance, or "rules," to aid in determining whether ownership or control of such organizations is expected or intended to be permanent.

Instead, the proposed standards establish principles for when relationships with organizations create a need for accountability, and how information should be included in GPFFRs. The Board believes it is important to address these relationship matters in a single Statement of Federal Financial Accounting Standards and has not proposed exceptions. The Board also addresses in this proposed Statement whether organizations are required to apply the GAAP hierarchy for federal reporting entities. Disclosure organizations are not required to apply the GAAP hierarchy for federal reporting entities and this should avoid giving the impression that all disclosure organizations included in GPFFRs are federal reporting entities or "part of the federal government." To further avoid giving this impression, the Board clarified that it is not the purpose of this Statement of Federal Financial Accounting Standards to assist in determining what entities are "part of the federal government" for legal or political purposes.

Refer to paragraphs 7, 13-14, 41, 49-53, and 65 of the proposed standards and paragraphs A1-A2, A9-A11, A20-A23, A30-A31, A44-A54, and A89-A93 in Appendix A – Basis for Conclusions for a discussion and related explanation.

- a. Do you agree or disagree with the alternative view that the proposed standards should not equate receiverships, conservatorships, and interventions with other disclosure organizations to avoid an inference that they are part of the Federal government? Please provide the rationale for your answer.

NO NSF COMMENT

- b. Do you agree or disagree with the alternative view that the guidance for all interventions, regardless of type, should be presented in a single Statement of Federal Financial Accounting Standard? Please provide the rationale for your answer.

NO NSF COMMENT
