ABOUT FASAB

FASAB serves the public interest by improving federal financial reporting through issuing federal financial accounting standards and providing guidance after considering the needs of external and internal users of federal financial information.

Financial reports, which include financial statements prepared in conformity with generally accepted accounting principles, are essential for public accountability and for an efficient and effective functioning of our democratic system of government. Thus, the Board plays a major role in fulfilling the government’s responsibility to be publicly accountable. Federal financial reports should be useful in assessing (1) the government’s accountability and its efficiency and effectiveness and (2) the economic, political, and social consequences, whether positive or negative, of the allocation and various uses of federal resources.

FASAB issues federal accounting standards after following a due process consistent with the Memorandum of Understanding under which it operates. Due process includes consideration of the financial and budgetary information needs of citizens, congressional oversight groups, executive agencies, and the needs of other users of federal financial information.
