CLARIFICATION OF PARAGRAPHS 40-41 OF SFFAS 6, ACCOUNTING FOR PROPERTY, PLANT, AND EQUIPMENT, AS AMENDED

STAFF IMPLEMENTATION GUIDANCE 6.1

July 17, 2018
Staff Implementation Guidance 6.1: Clarification of Paragraphs 40-41 of SFFAS 6, *Accounting for Property, Plant, and Equipment*, as amended

Summary

Introduction

1. After the issuance of Statement of Federal Financial Accounting Standards (SFFAS) 50, *Establishing Opening Balances for General Property, Plant, and Equipment: Amending Statement of Federal Financial Accounting Standards (SFFAS) 6, SFFAS 10, SFFAS 23, and Rescinding SFFAS 35*, Federal Accounting Standards Advisory Board (FASAB or “the Board”) staff identified certain necessary clarifications regarding whether both of the alternative methods for establishing opening balances and the alternative for estimated net remaining cost per the second sentence in paragraph 41 of SFFAS 6, as amended, could be applied.

2. The below Staff Implementation Guidance (SIG) Q&A addresses the question raised by the Department of Defense (DoD). SIG does not establish new requirements. Rather, SIG is intended to assist preparers in the application of FASAB literature.

Technical Guidance

3. **Q1:** Can both of the alternative methods for establishing opening balances provided by paragraph 40 of SFFAS 6, as amended, and the alternative to record property, plant, and equipment (PP&E) at its estimated net remaining cost provided by paragraph 41 of SFFAS 6, as amended, be applied?

---

1 These clarifications were outside the scope of the implementation guidance that FASAB provided in Technical Release (TR) 18, *Implementation Guidance for Establishing Opening Balances*.
4. Yes. Paragraph 40 of SFFAS 6, as amended, provides alternative methods for establishing opening balances for reporting entities that meet the specified conditions and elect to apply any of the alternative methods available.

5. For those reporting entities, the implementation guidance provided in paragraph 41 of SFFAS 6, as amended, may also be applied. Paragraph 41 states:

   Accumulated depreciation/amortization shall be recorded based on the estimated cost and the number of years the PP&E has been in use relative to its estimated useful life. Alternatively, the PP&E may be recorded at its estimated net remaining cost\(^{45}\) and depreciation/amortization charged over the remaining life based on that net remaining cost.

\(^{45}\)Net remaining cost is the original cost of the asset less any accumulated depreciation/amortization to date.

6. This alternative allows for PP&E to be recorded at its estimated net remaining cost (often called net book value), which is the original cost of the asset less any accumulated depreciation/amortization to date.\(^2\) This alternative was provided as a cost-beneficial option for the year of implementation.

7. An important premise for all the opening balance alternatives is that management should expect to provide adequate documentation that is consistent with the method used and supports the overall reasonableness of the valuation.\(^3\) Further, management is also responsible for maintaining adequate documentation of data sources and the application of methodologies.\(^4\) Applying the provisions of paragraph 41 does not alter the requirement to ensure adequate support for any values established for opening balances using the alternatives methods (such as deemed cost), including accumulated depreciation and in-service dates.

**Effective Date**

8. This guidance is effective upon issuance.

---

The provisions of this Staff Implementation Guidance need not be applied to immaterial items.

---

\(^2\) Therefore, in the year of implementation the opening balance of accumulated depreciation would be zero and the depreciation/amortization expense would be charged based on the net remaining cost and the remaining life. This alternative also is applicable to required disclosures articulated in par. 45 of SFFAS 6, as amended.

\(^3\) TR 18, par. 10.

\(^4\) TR 18, par. 11.
Basis for Conclusions

FASAB has authorized its staff to prepare SIG to provide timely guidance on certain financial accounting and reporting problems, in accordance with the Board’s rules of procedure, as amended and restated through October 2010. The provisions of SIG need not be applied to immaterial items.

This appendix discusses some factors considered significant by staff in reaching the conclusions in this SIG. It includes the reasons for accepting certain approaches and rejecting others. Some factors were given greater weight than other factors. The guidance enunciated in the technical guidance section—not the material in this appendix—should govern the accounting for specific transactions, events, or conditions.

This guidance may be affected by later Statements or other pronouncements. The FASAB Handbook is updated annually and includes a status section directing the reader to any subsequent pronouncements that amend this SIG. Within the text of the documents, the authoritative sections are updated for changes. However, this appendix will not be updated to reflect future changes. The reader can review the basis for conclusions of the amending Statement or other pronouncement for the rationale for each amendment.

A1. After the issuance of SFFAS 50, *Establishing Opening Balances for General Property, Plant, and Equipment: Amending Statement of Federal Financial Accounting Standards (SFFAS) 6, SFFAS 10, SFFAS 23, and Rescinding SFFAS 35*, DoD inquired whether the alternative methods for establishing opening balances could be applied in concert with the second sentence in paragraph 41 of SFFAS 6, as amended. Because “deemed cost” (as defined in the amendments to SFFAS 6) was not incorporated in paragraph 41, it may be unclear whether recording PP&E at “net remaining cost” is appropriate when deemed cost is used to establish initial amounts.

A2. FASAB staff drafted a response based upon the question received from DoD. Because deemed cost is a surrogate for initial costs, staff concluded the alternative to record PP&E at estimated net remaining cost is appropriate even when the surrogate or deemed cost is used. Staff hosted a public meeting with the preparer and auditor community to discuss the draft response.

A3. The participants discussed several issues regarding documentation and support for opening balances, including the underlying in-service dates, useful lives, and capital improvements. The participants noted concerns with these areas but understood that those particular issues went beyond the scope of the proposed SIG. Participants acknowledged that the proposed guidance related to a very narrow scope.

A4. The scope of this guidance is strictly to answer the question put forth in paragraph 3; it does not provide guidance on useful lives, estimating remaining useful lives, or the treatment of capital improvements.
A5. The proposed SIG 6.1: Clarification of Paragraphs 40-41 of SFFAS 6, *Accounting for Property, Plant, and Equipment*, as amended, was available for public comment for the required 15-day period. FASAB staff received four comment letters from federal preparers. No disagreements or suggestions were provided.

A6. The Board has reviewed this SIG and a majority of members do not object to its issuance.
