NEWS RELEASE FASAB Proposes Standards for Insurance Programs

The Chairman of the Federal Accounting Standards Advisory Board (FASAB), Tom Allen, announced today that the FASAB is seeking input on the exposure draft of a proposed Statement of Federal Financial Accounting Standards (SFFAS) entitled *Insurance Programs*. “The Board is seeking to improve federal financial reporting and to better inform readers about the operating performance of insurance programs and the risk of loss to the federal government from adverse events,” according to Chairman Allen.

To provide concise, meaningful, and transparent information regarding insurance program costs and liabilities, the exposure draft proposes to establish three categories of insurance and related guidance: exchange transaction insurance programs other than life insurance, nonexchange transaction insurance programs, and life insurance programs. The proposal would rescind existing standards for insurance and guarantee programs in SFFAS 5, *Accounting for Liabilities of The Federal Government*, paragraphs 97-121.

Respondents are encouraged to provide the reasons for their positions. The Board requests exposure draft comments by **March 29, 2016**. Both the exposure draft in PDF format and the specific questions raised in Microsoft Word format are available at the FASAB website <http://fasab.gov/board-activities/documents-for-comment/exposure-drafts-and-documents-for-comment/>.

ABOUT FASAB

The FASAB serves the public interest by improving federal financial reporting through issuing federal financial accounting standards and providing guidance after considering the needs of external and internal users of federal financial information.

Financial reports, which include financial statements prepared in conformity with generally accepted accounting principles, are essential for public accountability and for an efficient and effective functioning of our democratic system of government. Thus, the Board plays a major role in fulfilling the government's responsibility to be publicly accountable. Federal financial reports should be useful in assessing (1) the government's accountability and its efficiency and effectiveness, and (2) the economic,

political, and social consequences, whether positive or negative, of the allocation and various uses of federal resources.

The FASAB issues federal accounting standards after following a due process consistent with the Memorandum of Understanding under which it operates. Due process includes consideration of the financial and budgetary information needs of citizens, congressional oversight groups, executive agencies, and the needs of other users of federal financial information.
