Report to Stakeholders

The Chairman of the Federal Accounting Standards Advisory Board (FASAB), Tom Allen, provided a Report to Stakeholders: FASAB Three-Year Plan on January 11, 2012. According to Mr. Allen, “publishing this report makes board activities more transparent so that stakeholders have greater opportunities to engage the board. One of the most important decisions we make is where to focus our efforts. Stakeholder input on our plans would provide an essential ingredient to standards-setting and I encourage readers to submit their ideas.”

The report provides information about current projects as well as projects considered by the board in past agenda setting discussions. Readers are encouraged to submit their ideas and comments by February 7, 2012. Comments should be directed to Wendy Payne, FASAB executive director, at fasab@fasab.gov. The report is available at http://www.fasab.gov/about/our-annual-reports/ under “2012.”
FASAB Welcomes Intern from Kent State

Taylor Kopunovitz is a participant in Kent State University’s Washington Program in National Issues and will intern at FASAB through mid-April 2012. During her time with the board, she will provide research support and analyze information related to several ongoing projects. The internship provides her an opportunity for first-hand experience in standards-setting as well as exposure to federal government financial management issues. Taylor anticipates receiving her degree next December with a major in accounting and a minor in political science.

Current Board Projects

Federal Entity

At the December 2011 meeting, there were discussions on the government-wide portion of the federal entity project as well as the component entity phase. The updated exposure draft (ED), reviewed by members reflected decisions from the October Meeting and other changes suggested by board members and staff. These changes included the following:

- Revised Language for the Consolidation of Financial Accounting Standards Board (FASB)-based Information without Conversion as well as the additional language in the basis for conclusions
- Revised Language for Addressing the Federal Reserve System
- Editorial changes to streamline several sections

The following resulted regarding issues specific to the government-wide portion of the ED:

- The Board agreed the title will change to “Identifying and Reporting upon Organizations to Include in the General Purpose Federal Financial Reports”
- The Board approved draft language for recognizing core entities are federal entities for GAAP purposes.
- The Board voted to maintain paragraph 19 (In the Budget) with one minor edit.
- The Board generally agreed to the other changes and revisions to the ED.

In discussing the component entity phase of the project, the Board considered issues relating to adapting the first inclusion principle—In the Budget—for application by component entities. The Board also discussed the notion of the complete economic entity as it relates to component entities because there was concern about whether the
financial statements provide a complete representation of the component entity’s operations.

The following major decisions were made:

- The Board agreed that the basis for conclusions should discuss the reasons for the limitation that “the statements should be read with the realization that they are for a component of the U.S. Government, a sovereign entity.”
- The Board agreed the exclusion or exception for federal financial assistance should also apply at the component entity level.
- The Board decided staff should not attempt to develop additional principles for instances where an organization identified in the budget should not be considered part of the larger organization under which it is identified. Members noted they remain open to considering suggested wording if offered by one of the members supporting the development of such principles.

The reporting model project was not discussed during the December 2011 Board meeting. Staff is conducting roundtable discussions with Chief Financial Officers to determine their views on the changes needed in light of the current environment. Also, staff is interviewing agency managers and financial experts in the international arena to determine their information needs.

Deferred Maintenance & Asset Impairment

At the December 19, 2011 Board meeting the members (1) pre-balloted the draft standards entitled, *Deferred Maintenance and Repairs; Amending Statements of Federal Financial Accounting Standards 6, 14, 29 and 32* and (2) reviewed a draft Exposure Draft (ED) document entitled, *Accounting for Impairment of General Property, Plant, and Equipment Remaining in Use*.

**Deferred maintenance and repairs** - After reviewing the draft standards and discussing mostly editorial changes, the Board acknowledged satisfaction with the document and the Chairman asked staff to commence balloting procedures. The standard was approved in early January and will be subject to review both by Congress and the board’s sponsors. The review period is expected to extend into late spring 2012.

**Asset impairment** - After reviewing the draft Exposure Draft document the Board asked staff to commence pre-balloting procedures. Members paid particular attention to the following topics: (1) the costs versus benefits of implementing the standards, (2) applicability of the standards to diverse asset classes, (3) measuring the magnitude of the decline in service utility, (4) composition of operational and maintenance costs used when measuring the magnitude of the decline in service utility, and (5) the recognition of G-PP&E that do not meet the impairment test.
Earmarked Funds (Evaluating Existing Standards)

The Board continued to develop a draft Statement of Federal Financial Accounting Standards. The agenda session at the December 2011 meeting resulted in the following action items:

1. Staff will draft language to require reporting on the face of the statement of changes in net position for certain component entities, for example when dedicated collections are the predominant source of a component entity’s revenue and other financing sources.

2. Staff will draft a revised requirement for a reference to the earmarked funds note on the face of the statement of changes in net position for agencies that do not report on the face of the statement.

3. Staff will revise the document in accordance with staff recommendation to omit mention of the alternative display format in the standards, because it is already permitted under existing standards, and to retain the illustrations in the Appendix.

4. Staff will contact the agencies most likely to be impacted by the new standards and ask for comments on the implementation burden to implement in FY 2012 if the new standard is not issued until June 2012 or a subsequent date.

Investments and Other Equity Interests in Non-Federal Entities

This project was not discussed at the December 2011 board meeting. Background research and planning for task force efforts will begin shortly.

Leases

The Lease Project was not discussed at the December board meeting. Staff is continuing preliminary research on the project by following the developments of the FASB/IASB lease project, gathering information from federal entities on their leasing activities, developing a detailed task force plan, and a list of potential task force members.

Risk Assumed

The Risk Assumed Project was not discussed during the December 2011 Board meeting. Staff is continuing research on the types of risks assumed by the federal government.
